*Printing*, the square, formerly of the type m, used  
in typography as the unit for measuring and esti-

page, etc. The em of pica is the standard.

1864 *Daily Tel.* 3 Oct. [The printers' union] advanced its  
demands from forty-five cents to sixty cents per thousand  
'ems'. 1888 *Encycl. Brit.* s.v. *Typography*. The width of  
.. pages.. is expressed according to the number of 'ems',  
that is of a pica 'm'—the square of the depth of pica.. A  
page of 24 ems wide is equal to one of 4 inches.

**Em** (em), *pron.* Originally the unstressed  
form of **HEM**, *dat.* and *accus.* 3rd pers. *pl.* The  
emphatic form of the pronoun was early super-  
seded by **THEM**, but the unstressed form continued  
to be used, being regarded as an abbreviation of  
*them*. In literature it is now *obs.* or *arch.*, but  
is still common in familiar speech.

In north midland dialects *em* may have arisen from *them*:  
cf. South Yorkshire *at for that*. In strictly northern dia-  
lects it is never used.

**Em**, var. of **EMT**, *Obs.*, *uncle*.

**Em**, *prefix*, the form assumed by the prefix  
**EX-** (q. v.) before *b*, *p*, and (frequently) *m*. For

the reasons stated under **EN-**, nearly all the Eng.  
words with this prefix, whether of Romanic or  
Eng. formation, have (or formerly had) alternative  
forms with **IM-**. In this Dictionary the *em-* and the  
*im-* form, except where usage has introduced a  
distinction of sense between the two, will be  
treated as belonging to one and the same word,  
the article being placed under **E** or **I** in accordance  
with the principles explained under **EN-**.

The various functions of the prefix, and its use  
as an Eng. formative, are explained under **EN-**.  
Of the many compounds formed by prefixing *em-*  
to English words, those which have any special  
importance or require special remark, are inserted  
in their alphabetical place; the following are  
examples of those which are nonce-words or of  
rare occurrence.

The L. *imperator*, orig. denoting in general the holder of a chief military command, became in the period of the Roman republic a title of honour, bestowed on a victorious general by the acclamation of the army on the field of battle. This title was afterwards conferred by the senate on Julius Caesar and on Augustus, with reference to the military powers with which the chief of the state was invested; and in accordance with this precedent it was adopted by all the subsequent rulers of the empire except Tiberius and Claudius. In post-classical Latin it became the chief official designation of the sovereign, being interpreted in the sense of 'absolute ruler' (in Greek *αὐτοκράτωρ*). In this sense it continued to be applied to the rulers of the Western and Eastern Roman empires until they severally came to an end. In A.D. 800 when the Western empire was nominally revived, the Frankish king Charles the Great (Charlemagne) was crowned by the pope with the title of *imperator*, implying that he was invested with the same supremacy over European monarchs that the rulers of the earlier Roman empire had possessed. The title continued to be borne by his successors, the heads of the 'Holy Roman Empire' (popularly the 'Empire of Germany') down to its extinction in 1806. The Romanic (and hence the English) forms of the word were originally applied to the sovereigns of the Eastern empire, to those of the Romano-Germanic empire, and historically to those of the earlier Roman empire. For subsequent extensions of meaning (common to English with the Romanic langs.), see below in sense 3.]

1. The sovereign of the undivided Roman Empire, or of the Western or Eastern Empire.

2. The head of the Holy Roman Empire, also styled of Almaine or Germany.

In German documents *Kaiser* (the Teutonic form of the imperial name *CASAR*) was used in this sense, and is therefore regarded as the German equivalent of 'emperor'. 1297 R. Glouc. Empire* (ed. 4) xii. 186 No act of sovereignty is recorded to have been done by any of the Emperors in England.

3. In wider sense, as a title of sovereignty considered superior in dignity to that of 'king'.

In the Middle Ages, and subsequently, the title was often applied to extra-European monarchs ruling over wide territories. We still speak of the Emperors of China, Japan, Morocco, and historically of the Mogul Emperors of India and the Emperor of the Aztecs. Since the early part of the 16th c. the title has been used as the equivalent of the Russian *Tsar* (see *CZAR*). The Sultans of Turkey (who assumed the style of *Kesir-ar-Rûm*, 'Cæsar of Rome', as successors of the Byzantine emperors) were occasionally spoken of as emperors. Until the present century 'the Emperor' always, unless otherwise interpreted by the context, denoted the 'emperor of Germany'. But in 1804 Napoleon I. assumed the title of 'Emperor of the French', and in the same year the emperor Francis II 'of Germany' added to his other titles that of 'Emperor of Austria', which he retained when in 1806 he put an end to the Holy Roman Empire by his abdication. Subsequently the style of emperor has been adopted in several other instances. At present (1889) the only sovereigns so called are (apart from Asiatic and African potentates) those of Russia, Austria, Germany (since 1870), and Brazil (since 1822); and in 1876 the title of Empress of India was assumed by Queen Victoria.

**En**, early ME. variant of IN.

**En-**, *prefix*, the form assumed in Fr. (as also in Pr., Sp., Pg.) by the L. prepositional prefix *in-* (see IN-). The Eng. words in which it appears are partly adaptations of Fr. (occasionally Sp.) words, either of L. descent or formed in Romanic, and partly original formations upon Eng. words.

*A. Forms.*

1. In modern orthography and pronunciation *en-* becomes *em-* before *b* and *p*, and occasionally before *m*. This rule was not fully established in spelling before the 17th c.; in ME., as in OF. and OSP., *enb-*, *emb-* are more frequent than *em-*, *emp-*, though the latter may perhaps represent what was the actual pronunciation.

2. In ME. (as in OF.) *en-*, *em-*, freq. became *an-*, *am-* (a form which survives in AMBUSH). This *an-*, *am-*, like the native prefix *AN-*, was often reduced to *a-*: see APPAIR, APRISE. Conversely, the prefix *a-* of various origin was often changed into *en-*, as in *embrace*.

3. From 14th c. onwards the prefix IN- (IM-) has been frequently substituted for *en-* (*em-*); and, conversely, *en-* (*em-*) has been substituted for the prefix IN- (IM-) of words of L. or It. origin, and for the native Eng. IN-. Nearly every word, of long standing in the language, which is formed with *en-* has at some period been written also with *in-*. Hence it is often impossible to determine whether in a particular word of Eng. formation the prefix *en-* or *in-* is due to the analogy of words of Fr., Lat., or purely Eng. origin; in many instances it must have been applied merely as a recognized Eng. formative, without reference to the analogy of any individual word. In 17th c. the form *in-* (*im-*) was generally preferred; the now prevailing tendency is to use *en-* (*em-*) in Eng. formations, and where the prefix represents Fr. *en-*; and in mod. reprints of 17th c. books, and in Dicts., the *in-* (*im-*) of the original texts is often replaced by *en-* (*em-*). In some words, however, as *em-, imbed, en-, inclose*, the form with *in-* still occurs, but in most cases less frequently than the *en-* forms; in a few instances *in-* has entirely superseded *en-*, even where the latter is etymologically more correct, as in *imbrue, impair, inquest*. In a few words (e.g. ENSURE, INSURE) the alternative forms have (in very modern times) been appropriated to express different senses. As a general rule the *en-* and *in-* forms are in this Dict. treated as belonging to one and the same word. A word still surviving in use is treated in the alphabetical place of its now more frequent form. In the case of obs. words, where there is no decided preponderance in usage, the choice of the typical form has been determined by etymological considerations: thus the adapted words from Fr. or Sp. with *en-*, and new formations app. on the analogy of these, are by preference placed under E; while words app. formed on Latin analogies, or prob. originating as compounds of the Eng. prep. IN, will appear under I.

The substitution of *in-* for *en-* has in part been due to notions of etymological fitness, the Romanic *en-* having been regarded as a corrupt and improper form of the L. *in-*, while the Eng. formations in *en-* were either referred to L. analogies or treated as compounds of the native preposition. The phenomenon seems, however, to be partly of phonetic origin. The sound of (e) initial and unstressed has in careless speech a tendency to pass into (i) or (i): cf. the colloq. pronunciation of *effect, ellipse, essential*. Hence such forms as *embed, imbed, enclose, inclose* are in familiar pronunciation really homophones; many persons use the *en-* forms in writing, and (unconsciously) the *in-* forms in speech. From the occurrence of spellings like *imbraced* for *embased* in

the fourteenth century, it may be surmised that the tendency to 'raise' the initial (e) has existed from an early period.

*B. Signification and uses.*

The applications of the prefix in Fr. (Pr., Sp., Pg.), and hence in Eng., are substantially identical with those of the L. *in-*, which was used to form vbs. (1) from sbs., with sense 'to put (something) into or on what is denoted by the sb.', or 'to put' what is denoted by the sb. 'into or on (something)'; (2) from sbs. or adjs., with sense 'to bring or to come into a certain condition or state, to invest with a certain quality'; (3) from other vbs., with added notion of 'within', 'into', 'upon', or 'against', or with merely intensive force. Many L. or late L. words of this formation came down into Romanic, and have thence been adapted in Eng. In Romanic the prefix was extensively applied in the formation of new words, in strict accordance with L. analogies, exc. that in formations upon vbs. the notion of 'against' rarely or never occurs. In Eng. the analogy of the many words with *en-* adapted from Romanic gave rise to the extensive application of the prefix in the formation of Eng. words, its functions being the same as in Fr.

The compounds of EN- which have been in general use, or which require special comment, are given in their alphabetical place. The following are examples of those which are merely nonce-words, or of very rare occurrence. (See also EN-).

b. Verbs formed (with sense as above) on adjs. or sbs. with the prefix *en-* and the suffix *-en*, as ENLIVEN, ENLIGHTEN. Most of these verbs were formed by prefixing *en-* to an already existing verb in *-en*; but a considerable number seem to be directly f. the adj. or sb. on the analogy of those of the former class. For examples see 3.

3. Verbs, mostly transitive, formed by prefixing *en-* to a verb, with additional sense of *in*, or simply intensive (in poetry often merely to give an additional syllable); also vbs. f. *en-* + adj. or sb. + *en-* (see 2 b).

**En-, prefix** 2. The form taken by the Gr. *en*, etymologically cogn. with the prec. Chiefly in combinations already formed in Greek, as *enallage*, *endemic*, *energy*, *enthusiasm*; occas. in mod. formations as *enderon*. (Before *b*, *m*, *p*, *ph*, it takes the form *em-*; and before *l*, *r* it becomes *el*, *er* respectively.)

**-en, suffix** 1:—OTeut. *-ino(m)*, formally the nent. of *-ino*, *-en* 4, is used to form diminutives from sbs. (esp. names of animals), as in CHICKEN, KITTEN, MAIDEN, ME. *ticken* kid; also in ME. *stucken* small piece.

**-en, suffix** 2:—WGer. *-inija*, repr. OTeut. *-ini*, occurs in several OE. fem. sbs., a few of which have survived into mod. Eng.

1. It is used to form feminines from sbs. denoting male persons or animals, as in OE. *gyden* goddess (f. *god*), *myneccen* nun (f. *munne* monk), *wylfen* she-wolf (f. *wulf* wolf). The only surviving instance of this use is VIXEN female fox. 2. It is added in a few instances to the stem of a vb. or to that of a verbal-abstract sb., as in BORDEN, BOHMAN, OE. *raden* condition.

**-en, suffix** 3, the form assumed in ME. by the OE. *-an*, the termination of the nom., accus., and dat. plural of sbs. of the weak declension, as in

*oxa* masc., *ox*, pl. *oxan*; *tunge* fem., tongue, pl. *tuungan*; *earc* neut., ear, pl. *earan*. In origin the suffix belonged to the stem; but as in OE. the nom. sing. of these sbs. ended in *-a*, *-e* (levelled in ME. to *-e*), while the OE. *-an* of the oblique cases sing. became *-e* in ME., the termination *-en* came to be regarded as a formative of the plural, and its use was extended in southern ME. to many other words of OE. and Fr. origin. It was also added to the remains of other old plurals, as *brether*, *childer* (OE. *cildru*), *ky* (OE. *cý*), whence the modern *brethren*, *children*, *kine*. Apart from these the sole surviving representative (in standard Eng.) of this inflexion is *ox-en*; but *hos-en* (OE. *hosan*) continued in use until 17th c. In southern and south midland dialects the plurals in *-en* are still of frequent occurrence.

**-en, suffix** 4 (reduced to *-n* after *r* in unstressed syllables), corresponds to OS. *-in*, OHG. *-in* (Ger. *-en*), ON. *-in*, Gotb. *-eina-*—OTeut. *-ino-*, = Gr. *-ivo-*, L. *-ino-* (see *-INE*), added to noun-stems to form adjs. with sense 'pertaining to, of the nature of'. In Teut. the adjs. so formed chiefly indicate the material of which a thing is composed. Of the many words of this formation which existed in OE. scarcely any survive in mod. use; but the suffix was extensively applied in ME. to form new derivatives. Some of these took the place of OE. words, from which they formally differ only by the absence of unlaunt; compare OE. *gylden* with mod. Eng. *golden*, OE. *stēnen* (early ME. *stēnen*) with ME. and dial. *stōnen*, made of stone. From 16th c. onwards there has been in literary English a growing tendency to discard these adjs. for the attrib. use of the sb., as in 'a gold watch'; hence many of them have become wholly obs., and others (as *golden*, *silvern*) are seldom used except metaphorically, or with rhetorical emphasis. It is only in a few cases (e.g. *wooden*, *woollen*, *earthen*, *wheaten*) that these words are still familiarly used in their lit. sense. In s.w. dialects, however, the suffix is of common occurrence, being added without restriction to all sbs. denoting the material of which anything is composed, as in *glassen*, *steelten*, *tinnen*, *paperen*, etc.

**-en, suffix** 5, forming verbs.

1. from adjs., as *darken*, *deepen*, *harden*, *madden*, *moisten*, *widen*. Most of the words of this type seem to have been formed in late ME. or early mod. Eng., on the analogy of a few verbs which came down from OE. or were adopted from ON.; e.g. *fasten*:—OE. *fæstnian*; ? *brighten*:—ON. *berhtnia*; *berhtnia*; *harden*:—ON. *hārðna*. In Teut. there are two classes of vbs. formed upon the 'weak' or lengthened stems of adjs. (suffix *-on-*): (a) the intransitive (or in sense pass.) vbs. which in Goth. make the inf. in *-nan*, and the pa. t. in *-ōda*; e.g. *fullnan* to be filled, f. *fullan*—full; *gabignan* to be rich, f. *gabigan*—rich; *managnan* to abound, f. *managan*—many; (b) the originally trans. vbs. in OTeut. (*in* *nūjan*, e.g. OHG. *festinbu* to fasten, f. *feston* (=*-fastjon*)—fast. In Eng. these two classes of vbs. can scarcely be discriminated with precision, but in most cases the intr. sense (as in *deepen* = 'become deeper') appears to be derived from the trans. sense (as in *deepen* = 'make deeper').

2. from sbs. In OTeut. sbs. both of the weak and the strong declension gave rise to intr. verbs in (*in* *nūjan*), and this formation is represented by a few examples in OE., such as *hysinian* to LISTEN. In 14th c. some additional vbs. occur, formed app. on the analogy of these, as *happen*, *threaten*. The majority of Eng. words f. sb. + *-en*, however, such as *heighten*, *lengthen*, *strengthen*, *harden*, *barken*, appear first in mod. Eng., and seem to be due to the analogy of the verbs f. adj.

3. In one or two cases (e.g. *waken*) the suffix *-en* represents OTeut. *-na-*, the formative of the present stem in certain strong verbs.

**Enabit**, obs. var. INAHABIT.

**Enable** (en<sup>2</sup> b'l), v. Forms: 5-6 enable, 6-bel, 6 enable, inabable, -bilo, 6-8 inable, 5-enable. [f. EN-1 + ABLE a.: cf. ABLE v.]

-ence, *suffix*. [a. Fr. -ence, ad. L. -entia, form-  
ing abstr. sbs., usually of quality, rarely of action,  
on ppl. stems in -ent, e.g. *sapient-em* knowing,  
*sapient-ia* knowledge, sapience; *audient-em*  
bearing, *audient-ia* the process of hearing, audi-  
ence. As the ppl. stem had -ent-, -ant-, the deri-  
vative sbs. had -entia (*prudentia*), -antia (*in-  
fantia*); but all these were levelled in OFr. to  
-ance, in words that survived in popular use, or  
were formed analogically on the pr. pples in  
-ant; as *aidance*, *assistance*, *compliance*, *conten-  
ance*, *nuisance*, *parlance*, *science*. These were sbs.  
of action or process, the value with which the  
suffix was retained in Fr. as a living formative.  
But subsequently other L. words in -ntia, which  
had not survived in the living language, were re-  
adopted on the analogy of these, but with -ence  
or -ance according to the L. vowel, e.g. *absence*,  
*elmente*, *diligence*, *elégance*, *présence*, *providence*,  
*prudence*, *temperance*, *violence*. These were sbs.  
of quality or state; all Fr. words in -ence are of  
this class. Both classes were adopted in ME. in  
their actual Fr. forms and senses, which they  
generally still retain; but since 1500, some of those  
in -ance have been altered back to -ence after L.  
All words since adopted from or formed on L.,  
follow L. precedent as to -ence or -ance. The  
result is that the modern spelling of individual  
words, and still more of groups of cogn. words, is  
uncertain and discordant; cf. *assistance*, *consist-  
ence*, *existence*, *resistance*, *subsistence*; *attend-  
ance*, *superintendence*; *ascendant*, -ent-, -ancy,  
-ency, *condescendence*; *dependant*, -ent-, -ance,  
-ence, *independence*; *appearance*, *apparent*; *pertin-  
ence*, *appurtenance*. In sense, words in -nce are  
partly nouns of action, as in OFr., partly of state  
or quality, as in L. The latter idea is more dis-  
tinctly expressed by the variant -ncy (see -Y = -ie  
:-ia) which has been formed in Eng. as a direct  
adaptation of L. -ntia; see -ENCY, -ANTY.]

**-ency**, ad. L. -entia, the termination of abstract

sbs. formed upon pr. pples. (ppl. adjs. or sbs.) in

-ent- by means of the suffix -ia (whence Eng. -y

in *modesty, fallacy*, etc.: see -y, -cr).

The sbs. in -entia (like those in -ia generally) denoted

primarily qualities or states; but some of them

came by development of sense to be nouns of

action or process, and in late L. and in Romaine

the formation of nouns of action became the normal

function of the suffix. Consequently the Eng. sbs.

in -ENCE (which are adaptations of L. types in

-entia either through Fr. or according to Fr. ana-

logies) have very frequently the sense of action or

process, either in addition to, or to the exclusion

of, that of quality or state. The sbs. in -ency, on

the other hand, being purely English adaptations

of the Latin types, have properly only the sense

of quality or state, and concrete senses thence

developed. As exemplifying this difference of use

between the two suffixes, cf. *recurrence* and *cur-*

*rency*, *confluence* and *fluency*, *residence* and *pre-*

*sidency*. When the same word exists in both the

-ence and the -ency forms, the tendency is (where

the sense of the verbal etymon permits) to restrict

the former to action or process (i.e. to connect its

meaning rather with that of the vb. than with that

of the adj.), while the latter is used to express

quality; cf. *coherence* and *coherency*, *persistence*

and *persistency*. In a few instances both forms of

a word have equally the sense of quality or con-

dition; in most of these cases the one or the other

of the forms has become obsolete or archaic;

where they are both in current use, the distinction

usually is that -ency has a more distinct reference

to the sense of the related adj. or sb. in -ent, con-

sidered as the predicate of some particular subject;

cf. for example, 'sentence is an attribute of

animals' with 'some maintain the sentency of

plants'. See -ANCY.

Endlong (c'ndlɔŋ), prep., adv., and a. Forms: 3 andlong, 3-4 endlong, (4 endelyng), 4- endlong, 4- north, dial. endlang. [The early southern ME. *endelong*, f. *ende* END sb. + LONG, seems to have been substituted by popular etymology for the preposition *andlang* (see ALONG prep.), the first element of this having ceased to be intelligible, while the new compound yielded an identical sense (cf. *on end*, *end on*, *ENDAWAY*). In purely southern English *endelong* did not long survive, its place being taken by ALONG, the reduced form of the earlier *andlang*. But from 14th c. onwards *endlang*, *endlong* appear (as prep. and adv.) in northern and midland dialects, where they may be f. ON. *endelangr*, *endlangr* adj. (f. *ende*-r END + *langr* LONG), synonymous with OE. *andlang* adj. 'the whole length of'. In our quots. the adjectival use of *endlong* first occurs in a passage of Caxton's ed. of Trevisa's Higden, where it is substituted for *evelong* (= AVELONGE, oblong), used by Trevisa himself. Subsequently (in 17th c.) the adv. assumed the sense 'on end', 'end foremost or downwards', in accordance with the analogy of words like *headlong*, *sidelong*, where -long is a perversion of the OE. suffix -lunga. This use still occasionally appears in standard Eng.; the other uses are now peculiar to Sc. and northern dialects, except as deliberate archaisms.

Prof. Sievers (*Festsagen für Böhttingk* 1888) considers that the second element in OE. *andlang* is not identical with LONG a., but is directly from the OE. vb. \**ling-an*, *lang*, *lung-ano* to reach, extend. The ON. *endlangr*, *endlangr*, he regards as altered from *andlangr*, OE. *andlang* by popular etymology.]

1. To write on the back of something.

1. *trans.* To write on the back of (a document); to inscribe (words) on (the back of) a document.

a. In general sense: e.g. to inscribe (a document) on the back with words indicating the nature of its contents, with its opinion of its value, some extension or limitation of its provisions, etc. b. *Comm.* To sign one's name on the back of (a bill, promissory note, or cheque). c. Such documents may also be 'endorsed' by a subsequent holder, who thereby becomes responsible for their being paid (hence the *fig.* sense 2). Similarly a bank note is often 'endorsed' to show that it has passed through the endorser's hands.

**Enduce, obs.** variant of INDUCE.

**Endue, indue** (en-, indiʊ), *v.* Forms: a. 5-7 *endew*, 5-*endue*; b. 5-7, *indew*, (6) *yndue*, 5-*indue*. [ad. OF. *enduire* (also in semi-learned form *induire*), corresp. to Pr. *endurre*, Cat. *induir*, 57-2.

*It. inducere* (cf. the 'learned' forms Sp. *inducir*, Pg. *inducir*, It. *inducere*):—*L. inducere* (see *INDUCE*), f. *in* into, on + *ducere* to lead, draw. The etymological senses 'lead into', 'draw into', 'lead on', 'draw on', account for the Eng. senses 1-6, which approximately follow the senses of OF. *enduire*, *induire*. In senses 5-6, however, the word was associated with the nearly synonymous *L. induere* to put on (a garment), which it often renders in early translations from Latin. (Perhaps it would not be incorrect to say that the *L. induere* was adapted in a form coinciding with that of the verb ad. OF. *enduire*.) Senses 7-9 are of mixed origin: they are partly derived from the fig. use of sense 6 'to clothe' (cf. *invest*); but the forms *endew*, *indew* in 15th c. (sense 8) are etymologically equivalent to *ENDOW* (cf. OF. *deu* 1 pers. pres. indic. of *deor* to endow). Hence in 16th and 17th c. the verb *endue* had all the senses of *ENDOW* in addition to those which it derived from OF. *enduire* and *L. induere*. In sense 9 the meanings proceeding from the three sources have so completely coalesced that it is often impossible to say which of them is the most prominent in a particular use of the word.

The form *endue* is now the more common in all the living senses, though some writers employ it and *indue* indiscriminately, while others appropriate the latter to those uses (esp. senses 5, 6) which suggest an etymological connexion with *L. induere*. The obs. sense 2, when referred to by mod. writers, has commonly the spelling *endew*.

b. pl. Individual powers in exercise; activities. a 1745 *Bentley* (J.). How can concussion of atoms beget... powers and energies that we feel in our minds? 1763 in *Phil. Trans.* LXXIII. 160 Nature unquestionably abounds with numberless unthought-of energies, and modes of working. 1801 *Southey Thalaba* iii. xvi. There might his soul develop best its strengthening energies. 1849 *Ruskin Sew. Lamp.* vii. 184 A measure of license is necessary to exhibit the individual energies of things. 1861 *May Const. Hist.* (1863) I. 1. 6 The troublesome energies of Parliament.

5. Power not necessarily manifested in action; ability or capacity to produce an effect.

1677 *Half Prin. Orig. Man.* i. 26 We find in so small a particle of a created being this admirable energy. 1691 *T. H[ale] Acc. New Invent.* p. xxiii. Some vain Authors have essayed in print to give reasons for such energy of that Fish. 1732 *Atterbury Sermon.* IV. ix. (T.). 6. *Physic.* The power of 'doing work' possessed by any instant by a body or system of bodies. First used by Young (with reference to sense 4) to denote what is now called *actual, kinetic, or motive energy*, i.e. the power of doing work possessed by a moving body by virtue of its motion. (Young expressed the quantity of 'energy' in a particle as the product of the mass into the square of the velocity; it is now found more convenient to express it as the *half* of this product.) Now extended (first by Rankine) to include *potential, static, or latent energy, or energy of position*, i.e. the power of doing work possessed by a body in virtue of the stresses which result from its position relatively to other bodies. Also with adjs., *mechanical, molecular, chemical, electrical energy*, etc.

*Conservation of energy*: the doctrine that the quantity of energy in any system of bodies cannot be increased or diminished by any mutual action of those bodies, and that the total energy in the universe is a constant quantity.

1807 *T. Young Nat. Philos.* viii. (1845) I. 59 The term energy may be applied, with great propriety, to the product of the mass or weight of a body into the square of the number expressing its velocity. 1852 *Thomson in Philos. Mag.* 304 (title) Dissipation of Mechanical Energy. 1853 *W. Rankine Transform. Energy in Scient. Papers* (1881) 203 [Defines 'actual or sensible energy', 'potential or latent energy', 'conservation of energy']. 1863 *Tynöall Heat* i. § 9 Asserting that mechanical energy may be converted into heat. 1876 *M. Foster Physiol.* ii. v. (1870) 420 The animal body is a machine for converting potential into actual energy. 1878 *Huxley Physic.* 199 But whether this is the sole source of volcanic energy or not is uncertain. 1879 *Thomson & Tait Nat. Phil.* I. 1. § 27 In every case in which energy is lost by resistance, heat is generated.

† b. Suggested as a name for MOMENTUM. 1808 *Edin. Rev.* XII. 130 This modification of power [that of a moving body, 'proportional to the quantity of matter multiplied into the velocity'] might be called Energy.

c. *Veget. Phys.* *Energy of growth*: see *quat.* 1882 *Vines Sach. Bot.* 821 If the power of any particular zone to attain a definite length is called its Energy of Growth.

3. One whose profession is the designing and constructing of works of public utility, such as bridges,

roads, canals, railways, harbours, drainage works, gas and water works, etc. From 18th c. also *Civil Engineer*, for distinction from 2 b.

Not in Johnson 1755 or Todd 1818; the former has only the military sense, to which the latter adds 'a maker of engines', citing Bullock. In the early quots. the persons referred to were probably by profession military engineers, though the words mentioned were of a 'civil' character. Since 2 b has ceased to be a prominent sense of *engineer*, the term 'civil engineer' has lost its original antithetic force; but it continues to be the ordinary designation of the profession to which it was first applied, distinguishing it from that of 'mechanical engineer' (sense 4). Other phraseological combinations, as *electric, gas, mining, railway, telegraph engineer*, are used to designate those who devote themselves to special departments of engineering.

4. A contriver or maker of 'engines'. The precise sense has varied from time to time in accordance with the development of meaning in *ENGINE sb.*; in present use the *engineer* in this sense (specifically *mechanical engineer*) is a maker of steam-engines or of heavy machinery generally.

In this sense (but not in 3) the term is applied to the working artisan as well as to the employer of labour.

This word and its cognates, *English*, etc. are the only instances in which in mod. standard English the letter *e* stands in an accented syllable for (i). 2. The southern part of the island of Great Britain; usually, with the exception of Wales. Sometimes loosely used for: Great Britain. Often: The English (or British) nation or state.

In the writings of *Alfred* and the earlier parts of the *OE.* Chronicle, the name *Angel-cynn* race of the Angles (= *Bæda's gens Anglorum*) is used to denote collectively the Teutonic peoples in Britain, and also the territories which they occupied. This seems to have been the only general name for the country until the Danish conquest, when it was superseded by *Engla land*.

**A. adj.**  
1. In early uses now only *Hist.* Often with ellipsis of pl. sb. as in 2 d.

When the adj. first occurs in *OE.*, it had already lost its etymological sense 'of or belonging to the Angles' (as distinguished from Saxons). The earliest recorded sense is: Of or belonging to the group of Teutonic peoples collectively known as the *Angelicyn* ('Angle-kin' = *Bæda's gens Anglorum*), comprising the Angles, Saxons, and Jutes, who settled in Britain during the 5th c. With the incorporation of the Celtic and Scandinavian elements of the population into the 'English' people, the adj. came in the 11th c. to be applied to all natives of 'England', whatever their ancestry. But for a generation or two after the Norman Conquest, the descendants of the invaders, though born in England, continued to be regarded as 'French', so that the word *English*, as applied to persons, was for a time restricted to those whose ancestors were settled in England before the Conquest. In formal state documents the distinction between the 'French' and 'English' inhabitants of England survived after it had ceased practically to exist; cf. *ENG. LIT.* 1537.

1. The English language. First in the adverbial phrase, † *on* (now *in*) *English*. Also in phrase, *the king's, the queen's English*, app. suggested by phrases like 'to deface the king's coin'. Also *attrib.* as *English scholar*.

In 9th c., and prob. much earlier, *Englisc* was the name applied to all the Angle and Saxon dialects spoken in Britain. The name *English* for the language is thus older than the name *England* for the country. In its most comprehensive use, it includes all the dialects descended from the language of the early Teutonic conquerors of Britain; but it is sometimes popularly restricted to the language since the close of the 'Anglo-Saxon' or fully inflected stage; sometimes to the language and dialects of England proper, as distinguished from those of Scotland, Ireland, U.S., etc.; and sometimes to the literary or standard form of the language as distinct from illiterate or ungrammatical speech, etc.

[The use as sb. seems to have originated, not in the ellipsis of any particular word (e.g. *gerend*) meaning 'language', but in a vague absol. use of the neuter adj. A similar use is found in the other Teut. langs. and in Romance; cf. *Ger. auf deutsch*, *Fr. en français*, *Sp. en castellano*.]

a ongroyne, 6 ongrono. [f. EN-1, IN- + GRAIN.

Palstr. 1530 gives in Fr. *engrainier* to dye. The word, whether first formed in Fr. or Eng., was suggested by the Fr. phrase *en grain* (adapted in Eng. as *in grain*) where *grain* means the cochineal dye. Hence to engrain and to

dye in grain meant originally to dye with cochineal, and subsequently to dye in any fast colour. But afterwards they came to be associated with the word *grain*, a Fr. *grain*, the 'fibre' or minute structure of a thing; so that in mod. use 'to dye in (the) grain' means to impregnate the very substance of the material with the dye, to dye the wool before it is woven; and the present senses of the vb. *engrain* have distinct reference to grain 'minute structure.' On the whole the form *engrain* is now preferred to *ingrain*; see however the note on ENGRAINED *ppl. a.* 1.]

The OEtut. root \**nah*-3—Aryan \**nak* appears also in L. *nautisci* (pa. pple. *nac-tus*) to obtain, Skr. *nap* to reach.

The earlier OE. form *zenoh*, and the forms with inflexional termination, have their normal phonetic representative in Enow. In later OE. the *z* when final after a long vowel became in most dialects *h* (= *x*), but when medial remained unchanged; thus in this adj. the nom. sing. and the acc. sing. masc. and neut. became *geuath*, whence the mod. *enough*, while the nom. and acc. pl. were *zenoghe*, yielding Enow as their regular mod. form. Hence in many dialects, though not in all, the word *enough* (or its local equivalent), is employed in the sing. and in the advb. uses, while Enow serves for the plural. In 18th c. this distinction was recognized (e.g. by Johnson) as standard English; now, however, *enow* is in literary use entirely superseded, exc. as an intentional archaism, by *enough*.

The frequent ME. forms with final *t* may possibly be due to influence of the ON. neut. *gnōgt*; cf. however forms like *boght* for *Bougen*, *borch* for *borch*, *Borouen*, etc., where the *t* is merely excremental.]

The word freq. occurs in individual MSS. of Chaucer, but the better attested reading in these passages is *assure*. **Ent**<sup>2</sup> (ent). *a.* (quasi-sb.) *Metaph. rare.* [ad. late L. *ent*, *ent-is*: see *ENS*.] See quot. (rendering of Gr. *to dv*).

188. H. JACKSON in *Encycl. Brit.* XVIII. 315 Starting from the formula 'the Ent (or existent) is, the Nonent is not', Parmenides attempted, etc. *Ibid.*, The Ent, i.e. the existent unity, which reason discovers beneath the variety and mutability of things.

**-ent**, suffix. *a.* Fr. *-ent*, ad. L. *-ent-em*, the ending of pr. pples. of vhs. of the 2nd, 3rd, and 4th conjugation, as *vident-em*, *currentem*, *audientem*. (In the pples. of the 3rd and 4th conjugation this ending represents OArvan *-nt*, or perh. *-ent-*, of the ahlaut-series *-ent-*, *-ont-*, *-ut-*; cf. Skr. *-ant-*, *-at-*, Gr. *-ovr-*, Goth. *-and-*, OE. *-end-*; in those of the 2nd conjugation it represents this suffix combined with the thematic *-e-* of the vb.; similarly the *-ant-* of the 1st conjugation includes a thematic *-a-*.) In OFr. this suffix and the corresponding *-ant-em* of the 1st conjugation were levelled under *-ant*, the sole ending of the Fr. pr. pple., as *ariant*, *convariant*, *monvariant*, *levant* (:-L. *levantem*). At a later time many L. forms in *-ent-*, which had acquired an adj. sense, were adopted in Fr. as adjs. with the *-ent* unchanged, as *diligent*, *evident*; some of these were duplicates of living ppl. forms in *-ant*, as *convenient* = *convenant*, *provident* = *pourvoyant*, *confident* = *confiant*. The Fr. words in *-ant*, *-ent*, which were adopted into Eng., have generally retained the form of the suffix which they had in Fr.; but since 1500 there has been a tendency to refashion them after Lat., and hence several words in *-ant* have changed that ending for *-ent*, either entirely or in certain senses. In mod. Eng. also many Lat. words in *-entem* have been directly adopted, always in the form *-ent*. The conflict between Eng. and Fr. analogies occasions frequent inconsistency and uncertainty in the present spelling of words with this suffix; cf. e.g. *assistant*, *persistent*; *attendant*, *superintendent*; *dependent*, *-ent*, *independent*.

2. In sense the words in *-ent*, *-ant* are primarily adjs., sometimes distinctly ppl., as *convergent*, *obsolescent*, *errant*, *peccant*; some, however, are, like many words of the same type in Lat. and Fr., used as sbs. (either in addition to the adj. use or exclusively), meaning (*a.*) a personal agent, as *agent*, *claimant*, *president*, *regent*; (*b.*) a material agent, as *coefficient*, *current*, *ingredient*, *secant*, *tangent*, *torrent*; esp. in Medicine, as *aperient*, *astringent*, *emollient*, *expectorant*.

*Entitative* (ento'i-tiv), a. *Metaph.* [ad. med. L. *entitativus*, f. *entitativus* -a: see *ENTITY*.]

1. Pertaining to the mere existence of anything. *Entitative act*: transl. L. *actus entitativus*, a term used by the Scotists to denote 'material' as opposed to 'formal' or 'quidditative' actuality.

The word *act* in this phrase has its scholastic sense, 'that which differentiates an "actual" from a "potential" existence'. Duns Scotus, differing from Aquinas, recognized two kinds of 'act', i.e. two senses, or degrees in which, a thing might be said to have 'actual' existence: in one sense it is actual 'if it simply possesses the "matter" by virtue of which it has any existence other than merely potential; in the other sense, it is actual only when it possesses the "form" which gives it specific existence'. Hence in the language of his disciples the *entitative act* is the 'matter' of an actually existing thing, while the *formal act* is its 'form'; or, more accurately, they denote the possession of 'matter' and 'form' respectively.

[c. 1308 DUNS SCOTUS *Sent.* ii. xiii. § 11. *Uo modo actus est differentia entis opposita potentie. Alio modo actus dicitur habitudinem illam quam dicit forma ad informabile et ad totum ejus est. 1520 LYCIUS *Comm. on Duns Scotus Sent.* ii. xii. § 19 Sicut forma est actus formalis quia potest informare per receptionem ipsius, ita etiam materia est actus entitativus.] c. 1600 *Timon* iv. iii. † **Entropy** (entropi). *Physics.* [f. Gr. *τροπή* transformation (lit. 'turning'), after the analogy of ENERGY. First proposed by Clausius (1865) in Ger. form *entropie*.]

Clausius (*Pogg. Ann.* CXXXV. 390), assuming (unhistorically) the etymological sense of *energy* to be 'work-contents' (*werk-inhalt*), devised the term *entropy* as a corresponding designation for the 'transformation-contents' (*verwandlungsinhalt*) of a system.]

The name given to one of the quantitative elements which determine the thermodynamic condition of a portion of matter.

In Clausius's sense, the entropy of a system is the measure of the unavailability of its thermal energy for conversion into mechanical work. A portion of matter at uniform temperature retains its entropy unchanged so long as no heat passes to or from it, but if it receives a quantity of heat without change of temperature, the entropy is increased by an amount equal to the ratio of the mechanical equivalent of the quantity of heat to the absolute measure of the temperature on the thermodynamic scale. The entropy of

a system = the sum of the entropies of its parts, and is always increased by any transport of heat within the system; hence 'the entropy of the universe tends to a maximum' (Clausius). The term was first used in Eng. by Prof. Tait (see quot. 1868), who however proposed to use it in a sense exactly opposite to that of Clausius. In this he was followed (with an additional misunderstanding: see quot. 1875) by Maxwell and others; but subsequently Tait and Maxwell reverted to the original definition, which is now generally accepted.

1868 TAIT *Sketch Thermodynamics* 29 We shall... use the excellent term Entropy in the opposite sense to that in which Clausius has employed it—viz. so that the Entropy of the Universe tends to zero. 1875 MAXWELL *Th. Heat* (ed. 4) 183 *note*. In former editions of this book the meaning of the term Entropy as introduced by Clausius was erroneously stated to be that part of the energy which cannot be converted into work. The book then proceeded to use the term as equivalent to the available energy... In this edition I have endeavoured to use Entropy according to its original definition by Clausius. 1885 WARSON & BERNARD *Math. Th. Electr. & Magn.* I. 245 As in the working of a heat engine, the entropy of the system must be diminished by the process, that is, there must be equalisation of temperature.
